

# Closing Remarks

Wei Qiu, Memorial University

July 6, 2016

We had a successful workshop. There were a lot of constructive discussions and contributions. Thank you all!

13 attendees (one regret) – ~1/3 from industry, 1/3 from universities and 1/3 from government. Fleetway/Irving sent written contributions

A report summarizing the outcomes of this workshop will be uploaded to the website by the end of August.

# MIUN Workshop September

- Review of UBC workshop
- Prioritize research and training themes possible projects
- Establish the best model for iSMART
- Identification of funding opportunities
- Action items

- Input gathered at this workshop will be used to refine the agenda for the MUN workshop
- While many attending the UBC workshop will attend the MUN workshop, there will be new attendees who may provide additional ideas
- One of the objectives of this workshop is to develop a concept for the National Network. This will be taken further during the MUN workshop where the focus will be on the implementation of the concept
- Seek innovative funding schemes for supporting research

- **Homework**

- Are there any technologies beyond those identified in the UBC workshop that should be added?
- 35 people registered for the MUN workshop. Should we invite others to St. John's?
